

Global Gateway to
Electrotechnical
Standards in Belgium

Newsletter January 2017

Dear Members,

The CEB-BEC informs you that IEC has created a Technical Committee, in particular **IEC/TC 123 - Standardization of the management of assets in power systems**. The scope of this new TC is the Standardization in the field of the management of assets in power networks, especially aged equipment. If you are interested to follow the activities of the TC, please contact us.

Also Cenelec has created a CEN/CLC Joint Working Group - **CEN/CLC JWG 10 - Energy-related products - Material Efficiency Aspects for Ecodesign**. This CEN/CLC JWG 10 has as objective the development of relevant standardization deliverables required by M/543. Please contact us, if you want to participate in the work of the new Joint Working Group.

At its 154th meeting (2016-09-28), CENELEC BT decided to set up **CLC/BTWG 154-1 - EMC standardization in the EU regulatory framework**. The scope of this BTWG is to develop the necessary alignment elements between EMC standardisation activities and the regulatory framework. If you are interested to follow the activities of the TC, please contact us.

New way of voting on Belgian level - Vote "abstention" in the absence of a response from the members of the Belgian Technical mirror Committee.

In the interest of harmonization, it was decided to vote from now on **ABSTENTION** if no reply reaches us during the Belgian survey. This position is more in line with the Internal Regulations (Huishoudelijk reglement - Règlements d'ordre intérieur).

The CEB-BEC encourages you strongly **to consult the documents and share your comments via Collaboration Tools Suite (CTS)**. In doing so, the other members of the Technical mirror Committee will be informed about your position. Thank you in advance for your collaboration.

If you have any questions, don't hesitate to contact us.
