

Global Gateway to
Electrotechnical
Standards in Belgium

Newsletter December 2017

Dear Members,

The CEB-BEC is pleased to send you its latest newsletter. The CEB-BEC team wishes you a happy new year.

On November 24, 2017, the Belgian Bureau for Standardization (NBN) organized its annual event to honor all Belgian experts who contribute to the development of standards. During the award ceremony, four experts were particularly thanked for their exceptional contributions, of which Mr. Bart Van der Spiegel, member of the CEB-BEC Technical Committee 9 - Electrical equipment and systems for railways.

Future Challenges in Standardization

The IEC, IEEE and KATS are organizing a global academic challenge open to academia from engineering, information technology, economic, political and environmental sciences as well as research institutes and industry.

For more information, click [here](#).

Since 2014 the CEN-CENELEC Management Centre has organized “10-10 webinars”. These webinars are an opportunity to keep you updated on the latest developments in standardization and also on specific topics that could have a direct impact on technical work. The 10-10 webinars focus on the needs and interests of the CEN and CENELEC Technical Body Officers. However, all interested National Members, Partners and stakeholders are welcome to attend these sessions. The next 10-10 Webinar - **Discover the new CEN-CENELEC Meeting Centre and the Smart Working project** - will take place on December 8, 2017.

Discover plans, pictures and videos from scratch to an attractive brand new Meeting facilities.

Find out the CEN and CENELEC Smart Working approach. Get practical information for successful meetings at the new CEN and CENELEC premises. For more information and registration, click [here](#).

“Standards, a business tool for SME’s”

Millions of businesses – among which the vast majority are SMEs – are applying and using standards every day. Standards can improve an SME’s efficiency, help them to win new business and build customer confidence in their products and services. [This video](#) invites SMEs to take part in standardization and to contribute to the writing of the standards.

For more [information](#) about standardization and to contribute to the writing of a standard, please [contact us](#).

CENELEC Business Operations Support System (BOSS)

The BOSS provides practical information to those who are actively involved in the development of CENELEC deliverables and will gradually replace some elements of the ‘Members & Experts’ area of the CENELEC website.

What can you find on BOSS? Currently, processes for development of homegrown deliverables and useful Reference Documents such as Forms & templates as well as CEN/CENELEC Internal Regulations.

BOSS will be kept continuously updated to ensure that you always have the latest information to support your work....keep an eye as new elements will appear regularly!!!

Enjoy the [NEW CENELEC BOSS!](#)

Go Ahead, Get Ahead!

The **IEC Young Professionals Programme** is dedicated to the world's upcoming electrotechnology experts and leaders. It aims to increase their involvement in IEC work. The Programme includes the only annual workshop on the IEC dedicated to the next generation. The participants and their employers benefit from: important networking opportunities, being ahead

of the technology curve in their field, and ensuring technology transfer. For more information about the IEC Young Professionals Programme, click [here](#).

IEC Future Leaders Industry Forum - March 26-27, 2018

Learn more about, exchange, and develop a paper on Security in Smart Infrastructures. For more information, click [here](#).

e-tech - New and views from the IEC

Forthcoming CEB-BEC Meetings:

CEB-BEC 20 - Cables - December 8, 2017

CEB-BEC 7 - Overhead electrical conductors, December 14, 2017

CEB-BEC 11 - Overhead lines - December 14, 2017

CEB-BEC 38 - Instrument transformers - December 21, 2017

CEB-BEC 44 - Safety of machinery - December 21, 2017

CEB-BEC 65 - Industrial-process measurement, control and automation - December 21, 2017

CEB-BEC 40 - Capacitors and resistors for electronic equipment - January 9, 2018

CEB-BEC 34 - Lamps and related equipment - January 16, 2018

CEB-BEC 64 - Electrical installations and protection against electric shock - January 24, 2018

CEB-BEC 79 - Alarm systems - January 26, 2018
